PROJECTS

Custom Django REST Framework

Developed an extension for Django REST framework to simplify API development, view at github <https://github.com/Phani4423>

Organ donation management system Web App

Dedicated full-stack developer with expertise in Python, Django, and React. Successfully designed and implemented an organ donation management system web application, incorporating user authentication, donor registration, recipient matching, and transplant coordination features. Optimized database performance and ensured data security through robust security measures. Committed to leveraging technical skills to contribute to innovative healthcare solutions.

KEY ACHIEVEMENTS

Technical Achievements

Contributed to an open-source project by fixing a critical bug and improving code readability

Problem-Solving and Innovation

Demonstrated strong problem-solving skills by identifying and resolving issues efficiently

Teamwork and Collaboration

Provided mentorship to junior team members and helped them develop their technical skills.
